History The AutoCAD Cracked
2022 Latest Version product line
started in 1982 when the
AutoCAD Programmer's Guide
was published. AutoCAD 1.0 was
released in 1990. Version 1.0 has
been available for MS-DOS and
Microsoft Windows operating
systems. The Windows versions
of AutoCAD have continued to
be released with minor changes
and bug-fixes up to today. The
final release of AutoCAD 1.0 was
on September 30, 1992, and

AutoCAD 2.0 was released on April 30, 1994. The main AutoCAD series, which used the same underlying platform and functionality from version 1.0 to AutoCAD 2005, are: AutoCAD 2D Drawing Creation Software (2D/3D) AutoCAD 3D Drafting and Design Solution (3D) AutoCAD Civil 3D AutoCAD Architecture and Engineering (3D) AutoCAD 2D drawing creation software for 3D applications (1.0 and later)

AutoCAD 2D 3D is a multi-platform graphics creation software created by Autodesk. AutoCAD 2D 3D is a complete 3D package designed to work with a variety of CAD, BIM, and engineering systems. The main purpose of the product is to support the creation and design of three-dimensional models. The product was initially released in April 1991. Initially AutoCAD 2D 3D was a visual LISP-based product that used the visual LISP

programming language. Later in 1994, after it became known that the Visual LISP interface was not fully supported by many other Windows applications (in particular, Microsoft Word), the interface was changed to use a Visual Basic.NET-based software tool called the Visual LISP (VLB) interface. In April 1995, Autodesk released a beta version of the original Visual LISP interface. This interface was replaced with the Visual

Basic.NET-based VLB interface on April 30, 1996. The final release was AutoCAD 2D 3D 2005, although AutoCAD 2D 3D 2003, released in November 2003, was a major upgrade over the 2002 release. AutoCAD 2D 3D 2008 was a major upgrade over 2005's release and included many new features. With the release of AutoCAD 2D 3D 2008, the support of the original Visual LISP interface was removed. AutoCAD 2D 3D 2009
